Of all athletic wear, football uniforms and equipment present the most significant ① barrier to heat dissipation. Even with loose-fitting porous jerseys, the wrappings padding, helmet, and other objects of "armor" effectively seal off 50% of the body's surface from the benefits of ② evaporative cooling. Just wearing the 6 to 7 kg of football equipment significantly adds to the metabolic load, without considering the ③ thermal challenge from a hot artificial playing surface. The large body size of these athletes further ④ reduces the heat load, particularly for offensive and defensive linemen. They ⑤ possess a relatively small surface area-to-mass ratio and a higher percentage of body fat than players at other positions.

♠ (A), (B), (C)의 각 네모 안에서 문맥에 맞는 낱말로 가장 적절한 것은?

An alternative possibility for satisfying self-expressive needs and meaning in work can occur through leisure and avocational activities. Avocational activities are (A) (avoided / persued) systematically and consecutively for their own sake; the objective is something other than (B) (monetary / unfavorable) gain, which may incidentally occur. Leisure and avocational activities can be especially rewarding when other parts of one's life are not going as smoothly as one would like. People who put all their eggs in one basket, so to speak, (whether work, an intimate relationship, or parenthood) risk an imbalance that can (C) (adversely/ beneficially) affect their well-being as well as that of people around them. Leisure is hardly goofing off. Leisure provides a respite from work responsibilities and pressures.

1. persued ... monetary ... beneficially
2. avoided ... monetary ... beneficially
3. persued ... menotary ... adversely
4. avoided ... unfavorable ... adversely
5. persued ... unfavorable ... adversely
